Summary

Computer Science student specializing in Software Engineering, Red Team operations, and Linux System Administration. Proficient in C++ software engineering, Object-Oriented Programming (OOP), and data structures algorithms. Holds NTI certifications in Linux Systems Administration. Demonstrated expertise in system security auditing, network analysis, vulnerability assessment, and penetration testing.

Education

Benha University

Sep 2025 – Jun 2029

Bachelor of Science in Computers and Artificial Intelligence

Benha, Egypt

- Relevant Coursework: Object-Oriented Programming (C++), Data Structures, Algorithms, Computer Networks, Operating Systems, Linux Administration, System Security, Database Systems.

Experience

National Telecommunication Institute (NTI)

2026

Linux Administration Specialist Trainee

Remote / Egypt

- Configured Red Hat and CentOS Enterprise systems, managing ACL permissions, LVM storage, online volume extension, SELinux enforcement policies, and FirewallD security rules.
- Administered network protocol services including SSH, SCP, NFS, and Samba file sharing, alongside systemd daemons management, boot troubleshooting, and system hardening.
- Implemented Linux shell scripts, containerization environments, and automated log analysis procedures for system diagnostic auditing.

Projects

C++ Data Structures & Algorithmic Systems

- Developed custom C++ software modules implementing Linked Lists, Trees, Hash Tables, Pointers, and memory management algorithms.
- Executed algorithmic optimization and computational complexity reduction for high-performance execution in competitive programming.

Skills

Programming Languages & Concepts: C++, Object-Oriented Programming (OOP), Data Structures, Algorithms, Shell Scripting, Code Optimization

System Administration & Operating Systems: Linux Administration (CentOS/Kali), LVM Storage, SELinux, File ACLs, Systemd, FirewallD, SSH, SCP, NFS, Samba, Containers, System Hardening

Cybersecurity & Security Tools: Penetration Testing, Red Team Operations, Vulnerability Assessment, Web Security, Burp Suite, Wireshark, Nmap, Aircrack-ng

Tools & Frameworks: Git, GitHub, VS Code, Command Line Interface (CLI), MS Office

Soft Skills & Languages: Analytical Problem Solving, Critical Thinking, Team Collaboration, Technical Communication, Adaptability, Time Management, Team Leadership | Arabic (Native), English (Fluent - C1 Certified)

Certifications

Linux Administration Specialist Certificate — National Telecommunication Institute (NTI)

Professional Soft Skills Certification — National Telecommunication Institute (NTI)

Cyber Security Bootcamp Certificate — Benha University & GDG

C1 Advanced English Certification — Ministry of Defense Language Institute (MODLI)

Extracurricular Activities

ICPC Benha Community

2025 – Present

Competitive Programmer

Benha, Egypt

- Participating in algorithmic problem-solving contests, competitive programming training, and peer code analysis on Codeforces.
